GROWING THIRD-PARTY RISK

81%
of organizations **increased the number of third-parties** in their supply chain over the past two years [1]

More than **40% of cyberattacks** originate from the supply chain or an external party exploiting security vulnerabilities within the supply chain [2]
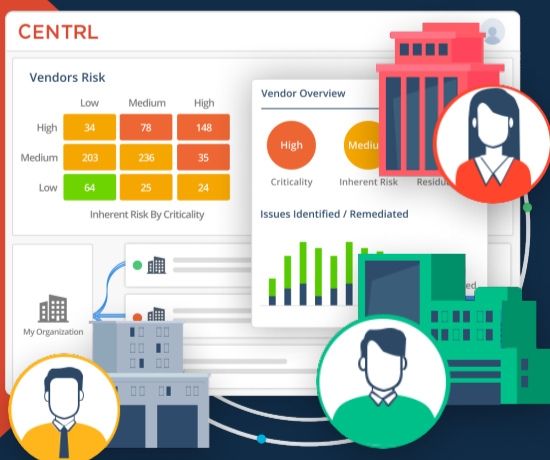

Over **80%** of supply chain executives **increased their outsourcing budgets** in 2020 to reduce costs and improve business efficiency [3]

The amount of data an enterprise generates **doubles** every 18 months [4]

*Experts have warned of a **430% increase** in supply chain attacks targeting open-source tools across different industries [5]*

HOW WE SOLVE IT

CENTRL

Vendors Risk

	Low	Medium	High
High	34	78	148
Medium	203	236	35
Low	64	25	24

Inherent Risk By Criticality
