

Response360

Answer RFPs, DDQs and security questionnaires in minutes — not days

Response360 is the first generative AI solution built specifically for the teams who respond to Requests for Proposals, Due Diligence Questionnaires and security questionnaires. It automates answering incoming questionnaires while continuously updating a central repository of your response content — dramatically reducing turnaround time while increasing accuracy and consistency.

Tailored for financial services, Response360 analyzes questions and extracts relevant information from your documents with a precision generic DDQ tools cannot match. By populating answers from your Answer Library and pulling data from uploaded policies and reports, it completes questionnaires within minutes — virtually eliminating the manual effort that invites human error.

“

Response360 has been a game changer for our organization. It does all of the heavy lifting for us. Instead of starting from scratch and spending hours looking for the correct answers, now I can simply go into the platform to verify the answers that are automatically populated for me.

— UK based Global Fund Manager

KEY BENEFITS

Minutes versus days

Answer DDQs and other questionnaires in a single sitting instead of across a week of chasing

One consistent voice

Response content is organized and managed in a centralized library so every questionnaire tells the same story

Accuracy you can defend

Advanced, domain-trained AI answers with a high degree of precision and a cited source for every response

Scales as you grow

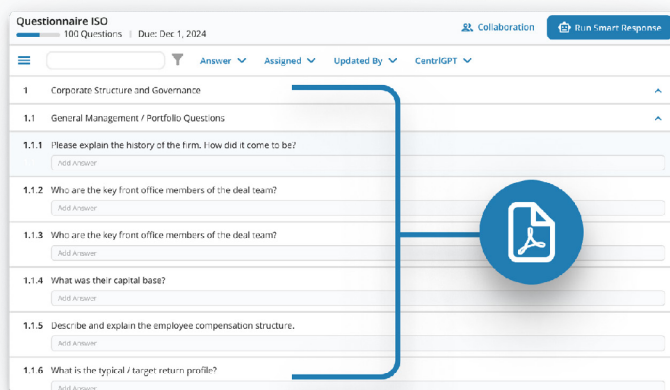

Adapts to evolving requirements, new question sets and rising volume without adding headcount

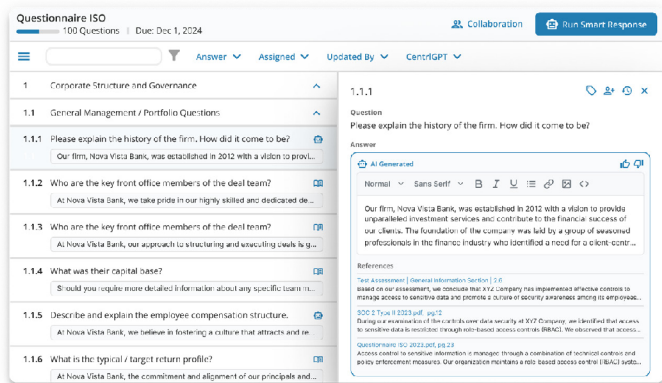

KEY FEATURES

Response360 combines AI-powered precision with operational efficiency — automating response processes, maintaining centralized content, and ensuring accuracy and scalability so teams navigate industry and regulatory shifts with confidence.

Seamlessly digitize all incoming RFPs, DDQs and questionnaires

- Easily converts Word, PDF and Excel documents into digital questionnaires, eliminating manual data entry
- Automatically handles uniquely structured questionnaires, so storing and responding happens in a single platform

Automatically answer questionnaires with a domain-trained AI model

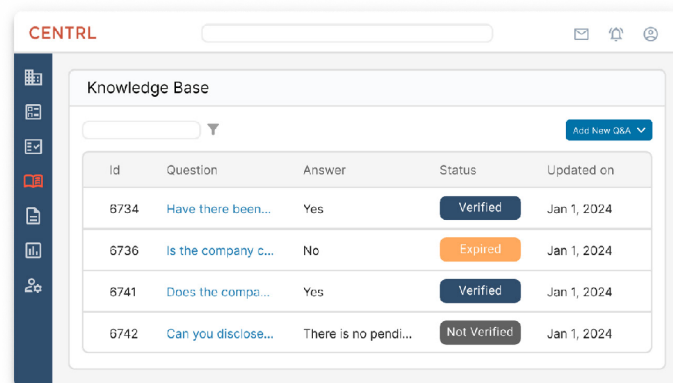

- An industry domain-trained model generates responses with unparalleled accuracy and speed
- Populates answers from your Answer Library with precision
- Extracts and generates answers from your policies, reports and other documents
- Completes questionnaires in minutes, not days

Effortlessly maintain a centralized, reliable source of responses

- A central repository for response content — accessible, consistent and accurate across teams
- AI-powered automation updates your Answer Library with proprietary answers
- Frees teams from manual content maintenance while protecting data integrity

A review process that fits your team's workflow

- Detailed source references behind every pre-filled response
- Supporting rationale that makes reviews informed and efficient
- Collaboration features track changes and keep the whole team aligned

"I've reclaimed at least 2 hours for every 100 questions using Response360. I can focus on more impactful tasks while it handles everything seamlessly in the background."

— Response Manager, North American Global Bank

CENTRL invests continuously in AI-powered solutions at the forefront of risk management — so organizations scale their processes, adapt to evolving risk landscapes and keep a consistent approach to mitigation.

CENTRLX FOR INVESTOR RELATIONS

Response360 runs on CentrIX, CENTRL's agentic AI platform — so IR teams extend beyond questionnaires into the rest of the investor communication cycle. Agents draft investor letters and quarterly updates from approved content, assemble consultant and prospect RFP packages, and answer ad hoc LP questions using the same governed Answer Library your DDQ responses come from.

Connect. Pre-built connectors to CRM, data rooms, file libraries, email and calendar, plus CENTRL Diligence and Response data and external sources such as Form ADV.

Build. A curated library of IR agents built by CENTRL practitioners — clone and tune them to your fund terminology, disclosure language and preferred formats.

Govern. Role-based permissions, human approval before anything reaches an investor, and a full audit history of every generated response.

Draft the Q3 investor letter from our approved performance commentary.

Which answers in this consultant RFP are still unverified?

Compare how we answered ESG questions across our last five LP DDQs.
